NATURAL PET CARE

PURUS pet

NEW IN -
NEXT-GENERATION SKIN & COAT CARE

Product name
MICROBIOME SUPPORT SPRAY -
A science-driven microbiome support spray designed to help maintain healthy skin and coat condition for pets.

Volume
200 mL

Product description
Gentle leave-on formula combines prebiotics, probiotic-derived actives, and advanced moisturizing actives to support the natural balance of the pet skin ecosystem.

Why Microbiome Care for Pets?
- Pet skin hosts a complex microbiome ecosystem that plays a key role in skin comfort, barrier function, and coat health.
- Environmental stress, grooming products, and seasonal changes can disrupt this balance.
- Our microbiome-focused spray helps restore harmony while hydrating and conditioning the skin.

Claims
- Ingredients of natural origin
- Helps to support the natural skin
- microbiome;
- Ideal for daily or post-grooming care;
- Suitable for sensitive skin types
- pH balanced
- Vegan
- Fragrance free

Ingredients
Actual version on the webpage - www.puruspet.com

MICROBIOME-FRIENDLY INGREDIENT CONCEPT:

- **Lactobacillus Ferment Lysate -** Probiotic-derived ingredient designed to support a balanced skin environment.
- **Lactobacillus Ferment -** Probiotic-derived ingredient obtained through the fermentation of Lactobacillus bacteria to help support the skin's natural microbiome while contributing to product preservation and skin conditioning.
- **Inulin -** Plant-derived prebiotic that helps support beneficial microorganisms on the skin surface.
- **Saccharide Isomerate -** A carbohydrate complex known for its ability to bind to skin and helping maintain the skin's natural moisture balance.
- **Arginine -** Skin-friendly amino acid that helps maintain optimal formula pH and skin compatibility.

DIRECTIONS FOR USE:

- Spray lightly onto the pet's coat and skin **from a short distance.**
- Massage gently or brush through the coat **if desired.**

USE:

- **Between grooming sessions**
- **After bathing**
- **As part of a regular coat care routine**
