

DENTAL GEL WITH ENZYME

Product description

A gentle yet effective dental gel specially formulated for everyday pet oral care. Hydrated Silica provides mild, non-abrasive polishing action, gently removing surface stains and tartar build-up without damaging enamel. Erythritol — a naturally derived sugar alcohol — helps reduce plaque adhesion and creates an unwelcoming environment for harmful oral bacteria. Papain, a natural enzyme derived from papaya, delivers gentle enzymatic cleaning by breaking down protein-based stains and residues on the tooth surface.

Volume

50 mL

Key benefits

- Gentle, alcohol-free formula
- Suitable for regular use in pets
- Supports oral hygiene
